

Working with Extended File Properties

All Windows files include several standard properties including:

- *Name, Date modified, Date created / Date last accessed*
- *File size / file type / author / location*

Several of these are shown in the details view in Windows File Explorer

ExampleDatabases > Access Media Player				
Search Access Media Player				
Name	Date modified	Type	Size	
 Access Media Player	17/01/2018 16:49	Shortcut	2 KB	
 AccessMediaPlayer - CR.accdb	20/07/2021 01:00	Microsoft Access Database	784 KB	
 AccessMediaPlayer - CR.zip	23/03/2021 19:25	Compressed (zipped) Folder	977 KB	
 AccessMediaPlayer.accdb	17/07/2021 10:54	Microsoft Access Database	960 KB	
 AccessMediaPlayer.zip	03/07/2021 22:51	Compressed (zipped) Folder	84 KB	

Additional extended properties may be shown for certain special folders. For example:

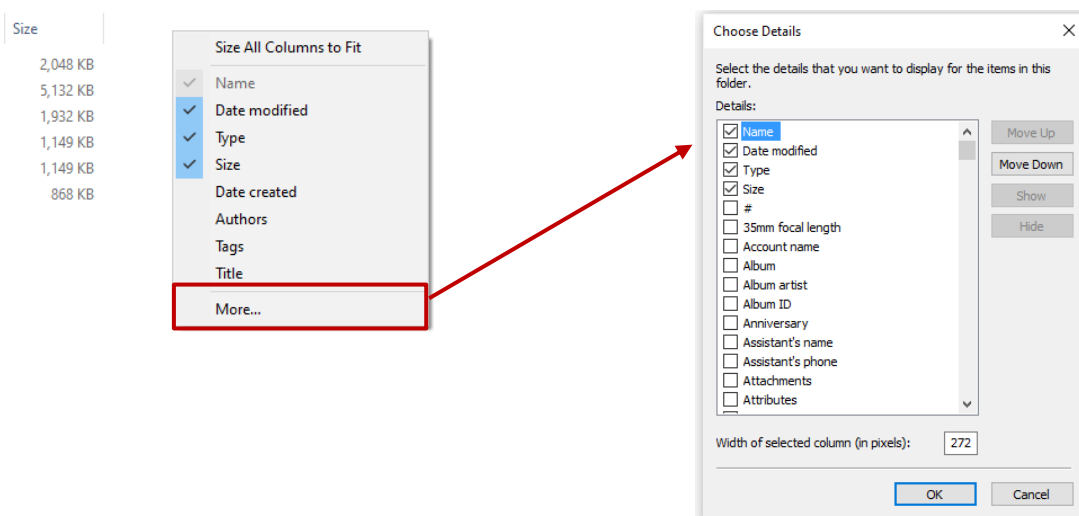

- *Height / width / horizontal resolution / vertical resolution / bit size (image files)*
- *Contributing artist / album / year / genre / tile / track # / length / bit rate (audio files)*

Documents > Music > Abdullah Dollar Brand Ibrahim > African Sun					
Search African Sun					
Name	#	Title	Contributing artists	Album	Length
 02 Bra Joe From Kili...	2	Bra Joe From Kilimanjaro	Abdullah Ibrahim	African Sun	00:06:14
 03 Rolling.mp3	3	Rolling	Abdullah Ibrahim	African Sun	00:07:28
 04 Memories Of Yo...	4	Memories Of You	Abdullah Ibrahim	African Sun	00:04:50
 05 Sathima.mp3	5	Sathima	Abdullah Ibrahim	African Sun	00:11:26
 06 African Herbs.mp3	6	African Herbs	Abdullah Ibrahim	African Sun	00:10:40

NOTE:

There are currently a total of 321 extended properties which may be stored though no individual file will have all of these. The details MAY vary depending on the computer used & Windows/Office version.

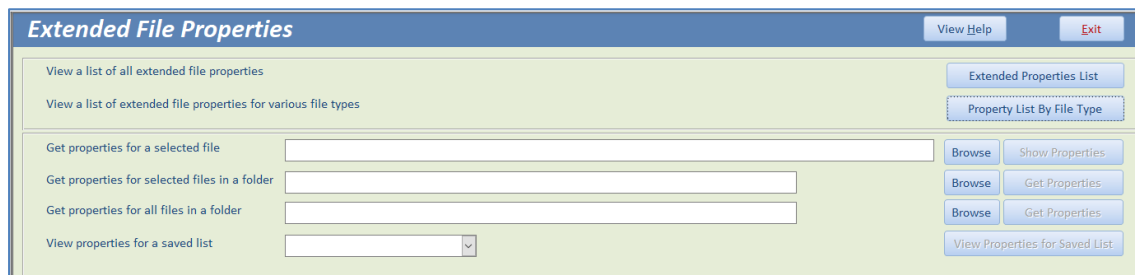

Additional extended properties can be viewed by **right clicking** on the heading area of the folder
Tick from the properties listed or click **More** to see the full list:

This utility app provides a simple way of obtaining all the extended properties for a single file or for all files in a selected folder and its subfolders.

The code to get extended properties uses the **GetDetailsOf** member of the **Shell32.dll** library file. As a result, the VBA reference library **Windows Shell Controls and Automation** is required.

All features are available from the main form though some items will be disabled or hidden at first:

NOTE:

All extended property names are language specific.

On first use, the app will check your current Office language.

If this isn't English, the app will convert all extended property names to your current Office language.

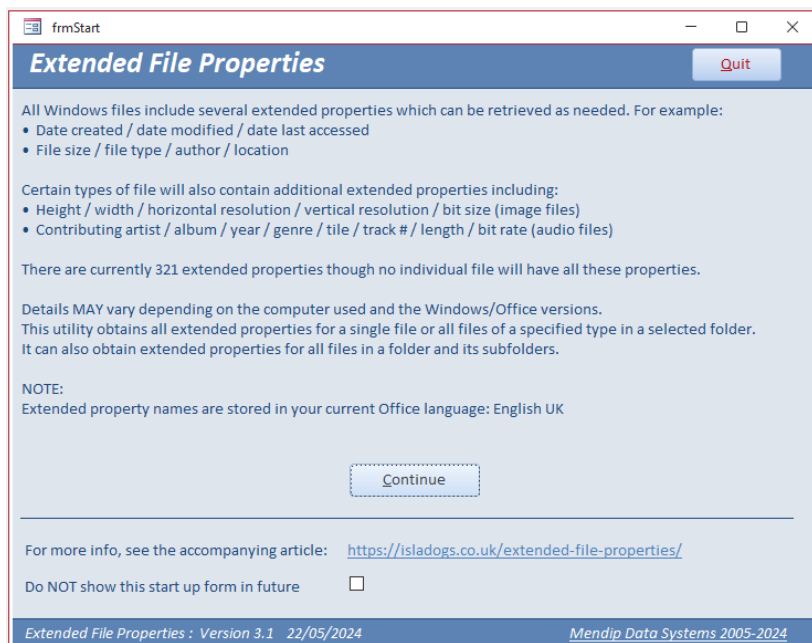

This conversion only needs to be done once and should take less than a minute.

For more details, see [section 7](#)

Version 3.4 26 May 2024

1. Startup Form

The app opens to a startup form giving information about its purpose and features

The startup form is also used to check whether the current Office language matches that used for the saved extended properties data.

Tick the checkbox if you want to hide the startup form in future

Click **Continue** to open the **main form**

Number of extended properties 33

The list of extended properties available for that type of file has also been saved.

The **Property List By File Type** button is now also enabled. Click to view a summary report.

The example below shows the first page of a report with extended properties for 37 different file types. The report can display up to 40 different file types. If you exceed this, an error will occur.

[illegible]

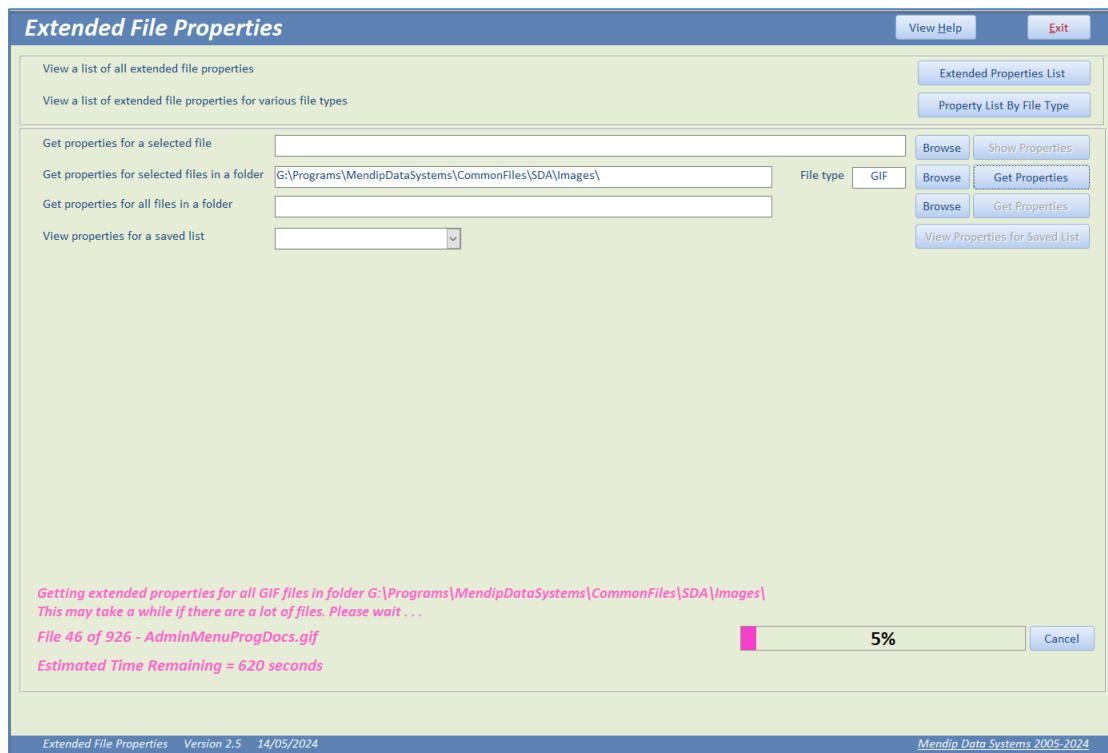

NOTE: This is an example of a 'dynamic crosstab report'. Column headings are automatically updated each time extended properties are saved for additional file types

4. **Extended Properties for all files of a selected type in a folder**

Click the second **Browse** button and select a file of the required type.

Click the **Get Properties** button

The program will loop through all files of that type collecting the extended property details.
A progress bar is updated as each file is processed

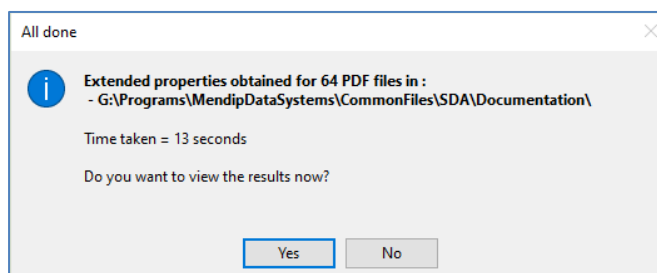

NOTE:

This may take several minutes if there are many files to process.

The estimated time remaining is displayed.

If this is taking too long, use the **Cancel** button to end the process.

When the process has completed, a message like this will be displayed:

Click **Yes** to view a list of selected properties for each file

Click the 'Save Properties Data' button to save the results for future use Save Properties Data

Select a file in the list above then click the button to view all extended properties Print Selected File Print All Files

Extended File Properties Version 2.5 14/05/2024 Mendip Data Systems 2005-2024

As before, the extended properties summary details for this file type are also saved.

Several additional features are now available:

- Click the **Save Properties Data** button to save these details for future use if required. A message like this will appear:

Save extended property data?

 **This will save the extended property data to a table.**

The table name will be : 'Documentation_pdf'
i.e. table name format = 'FolderName_FileType'

If the table does not exist, it will be created
If the table exists, it will be overwritten

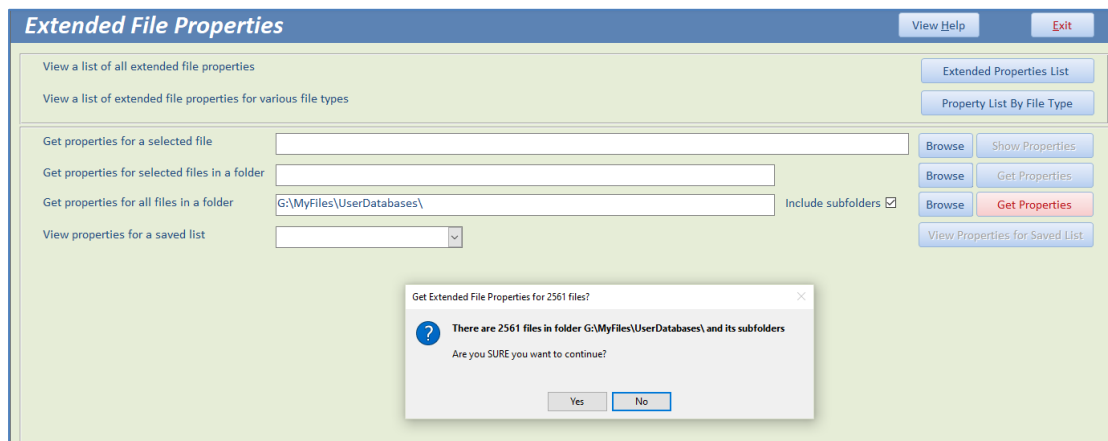

OK Cancel

Click **OK** to save the data

- Click a file name from the list. The **Print Selected File** button is then enabled. Click the button to view a report listing all extended properties for the selected file
- Click the **Print All Files** button to view a report listing extended properties for each file in the list

5. **Extended Properties for all files in a folder / subfolders**

Click the third **Browse** button and select a folder. Optionally tick the **checkbox** to include all files in the subfolders as well. Click the **Get Properties** button

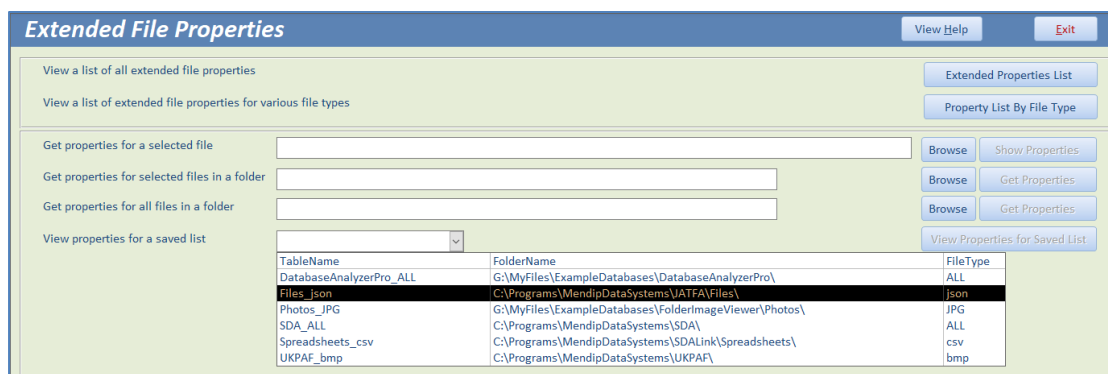

The total number of files in the selected folder(s) is counted so you can decide whether to continue. If you have several thousand files, processing may take some time.

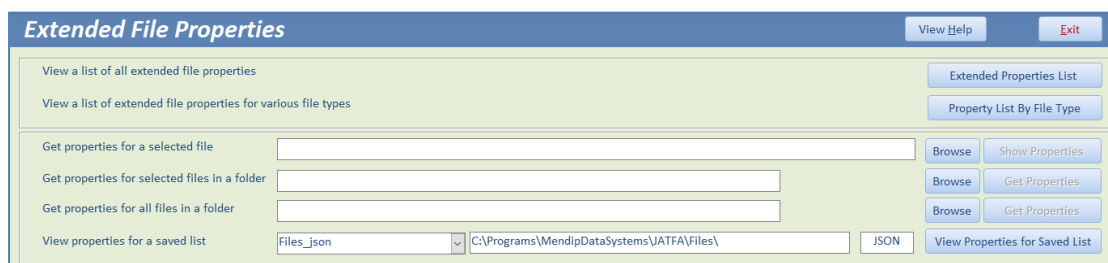

As before, you can view the extended properties for each file once the processing has completed either as a list or in a report. The properties can also be saved for future use,

6. **View Extended Properties for a saved list**

Select a previously saved list using the combo box as shown below:

Now click the **View Properties for a Saved List** button which is now enabled.

The extended properties summary will appear immediately as shown below:

7. Update Extended Property Names to match Office language

Extended property names are localised depending on the Office language. For example:

English		Spanish (Modern)	
Extended File Properties List		Extended File Properties List	
ID	Extended Property	ID	Extended Property
0	Name	0	Nombre
1	Size	1	Tamaño
2	Item type	2	Tipo de elemento
3	Date modified	3	Fecha de modificación
4	Date created	4	Fecha de creación
5	Date accessed	5	Fecha de acceso
6	Attributes	6	Atributos
7	Offline status	7	Estado sin conexión
8	Availability	8	Disponibilidad
9	Perceived type	9	Tipo percibido
10	Owner	10	Propietario
11	Kind	11	Clase
12	Date taken	12	Fecha de captura
13	Contributing artists	13	Interpretes colaboradores
14	Album	14	Álbum
15	Year	15	Año
16	Genre	16	Género
17	Conductors	17	Conductores
18	Tags	18	Etiquetas
19	Rating	19	Clasificación
20	Authors	20	Autores
21	Title	21	Título
22	Subject	22	Asunto
23	Categories	23	Categorías
24	Comments	24	Comentarios
25	Copyright	25	Derechos de autor
26	#	26	Número de pista
27	Length	27	Duración
28	Bit rate	28	Velocidad de bits
29	Protected	29	Modo protegido
30	Camera model	30	Modelo de cámara
31	Dimensions	31	Dimensiones
32	Camera maker	32	Fabricante de cámara
33	Company	33	Organización
34	File description	34	Descripción del archivo
35	Masters keywords	35	Palabras clave maestras
36	Masters keywords	36	Palabras clave maestras
37	Program name	37	
38	Duration	38	
39	Is online	39	
40	Is recurring	40	
41	Location	41	
42	Optional attendee addresses	42	Nombre del programa
43	Optional attendees	43	Duración de evento
44	Organiser address	44	Está conectado
45	Organiser name	45	Recurrente
46	Reminder time	46	Ubicación
47	Required attendee addresses	47	Direcciones de los asistentes opcionales
48	Required attendees	48	Asistentes opcionales
49	Resources	49	Dirección del organizador

The application is supplied with extended property names in English. When the app is first used, it will check whether the Office language is different. If so, when the main form is first opened, you will see a message similar to this:

Extended File Properties View Help Exit

View a list of all extended file properties

View a list of extended file properties for various file types

Get properties for a selected file

Get properties for selected files in a folder

Get properties for all files in a folder

Extended Properties List

Property List By File Type

Browse Show Properties

Browse Get Properties

Browse Get Properties

Language issue

Extended properties need to be updated to match the current Office language: German

This is a 2 step process

Step 1: click the Browse button to select a file then click the Show Properties button

OK

Updating the language for the extended properties is a two step process that takes less than a minute. Click **OK** then click the **Browse** button and select any file. Click **Show Properties**.

Extended File Properties View Help Exit

View a list of all extended file properties

View a list of extended file properties for various file types

Get properties for a selected file

Get properties for selected files in a folder

Get properties for all files in a folder

Extended Properties List

Property List By File Type

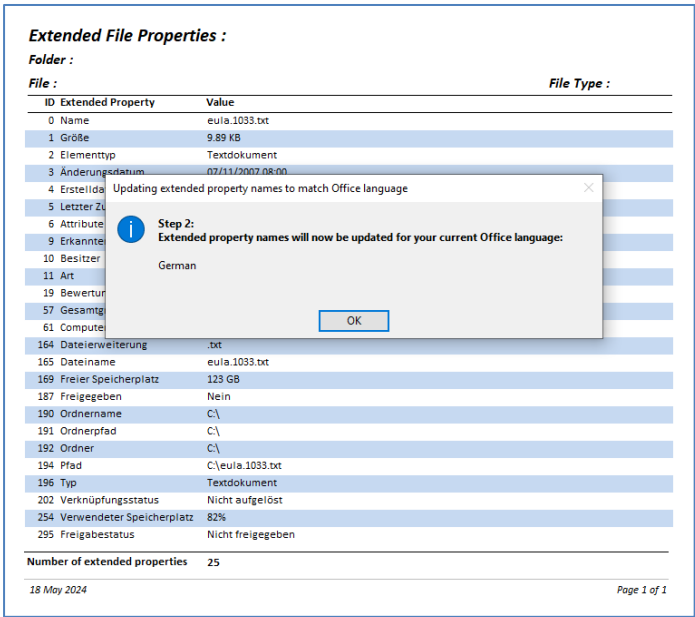

Browse Show Properties

Browse Get Properties

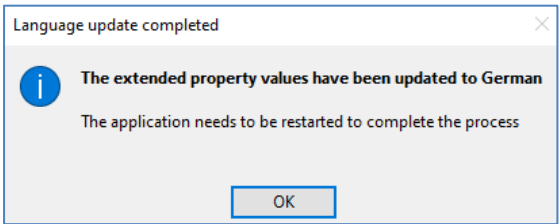

Browse Get Properties

C:\eula.1033.txt

A report opens with the extended property names in your current Office language
A message appears:

Click **OK** to complete the conversion process. A few seconds later, a message similar to this appears:

Click **OK** to close the application.
On restarting, the extended property names will be in your current Office language

NOTE:
If you change your Office language at any time, the app will detect the change and allow you to run the language update again.
